

Questions and Responses 11.27.18

1. How were the specs determined for this build? Was there a consultant or vendor involved?

CML used the Lenovo psref website. <http://psref.lenovo.com/Compare>

2. Will CML accept a bid/quote for hardware and imaging only?

Yes

3. Will CML award this bid to one contractor/ vendor or is the library going to make the best financial decision for each portion of this project?

The award will go to one contractor based on the responses we receive. If the price changes significantly from the time we make the award, CML would be forced to make the best financial decision for the organization.

4. Will these machines be installed at the same location? If no, how many other locations are there and what are those addresses?

Workstations will be deployed at 3 locations. Laptops will be delivered to CML IT for deployment at our Operations Center.
