2017 CENTRAL OHIO STEM EXPO

SATURDAY, FEBRUARY 25, 2017 10 AM—2 PM

**COSI (CENTER OF SCIENCE AND INDUSTRY)
333 WEST BROAD STREET, COLUMBUS, OHIO**

The Central Ohio STEM Expo is a free (including parking) educational outreach event for students grades K through 8 that will feature fun, interactive activities and exhibits in the Science, Technology, Engineering and Math fields. Last year's student participants built truss bridges and straw towers, met a tortoise, modeled buildings, explored magnetism, built race cars out of food items, floated on a hovercraft, and interacted with numerous other activities and exhibits. As an added bonus, this year, participants will have the opportunity to receive reduced price admission to explore the rest of the COSI facility the day of the STEM Expo and watch the new "Dream Big: Engineering Our World" on COSI's giant screen.

Pre-Registration

Please visit the event webpage at http://centralohioasce.org/2017_STEM_Expo to RSVP for this event. Pre-registration is encouraged but registration will also be available the day of the event.
