**CONSTRUCTION PHASES AND SERVICES**
- Construction site will be kept clean. Work areas will be vacated and cleared of all materials and equipment at the end of each day and during the project. Work shall be performed in coordination with the owner and engineer to maintain existing services to all areas affected by the work. The contractor shall submit a phasing plan to the engineer for approval prior to proceeding with work which is deemed in conflict with the applicable codes or specifications.

**PHYSICAL RESTORATION NOTES**
- For pre-construction coordination, the contractor shall submit a phasing plan to the owner for approval prior to proceeding with work which is deemed in conflict with the applicable codes or specifications.

**L. PRELIMINARY DRAWINGS AND NOTES**
- The contractor is solely responsible for preparing shop drawings for all work items. The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**M. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**N. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**O. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**P. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**Q. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**R. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**S. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**T. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**U. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**V. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**W. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**X. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**Y. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.

**Z. GENERAL CONCRETE REQUIREMENTS**
- The contractor shall verify work hours with the owner. Contractor shall coordinate off-site work with the owner.
1. CONTRACTOR IS RESPONSIBLE FOR DETERMINING ACTUAL EXTENT AND LOCATIONS OF REPAIR AREAS IN ACCORDANCE WITH THE SPECIFICATIONS. WORK ITEM IS SHOWN ONLY TO REPRESENT THE TYPES OF DETERIORATION.

2. REFER TO R-001 FOR LEGEND, GENERAL NOTES, AND W.I. SCHEDULE.

3. REFER TO R-500 SERIES FOR REPAIR DETAILS.

4. CONTRACTOR SHALL MAINTAIN OR PROVIDE TEMPORARY POWER TO ALL LIGHT FIXTURES. IN FULL DEPTH REPAIR AREAS OR REPAIR AREAS ADJACENT TO CONDUIT, CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVING AND REINSTALLING LIGHT FIXTURES AND CONDUITS.

5. FOR REFERENCE
