

Make your own Flower Garden

Materials needed:

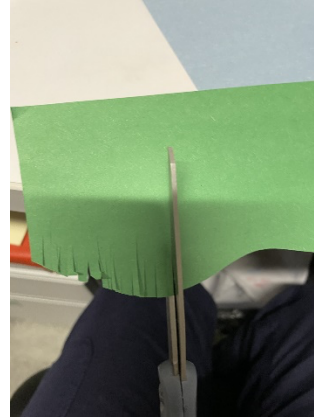

- Paper (any color you want)
- Crayons or Markers
- Scissors
 - Tips for practicing scissor cutting: Thumb goes in the little circle, rest of fingers in the big spot. Keep your elbow tucked in, open scissors and chomp like an alligator.
- Glue

Directions:

1. Choose a piece of colored paper as your background. If you want to make a ground, create and glue onto background.

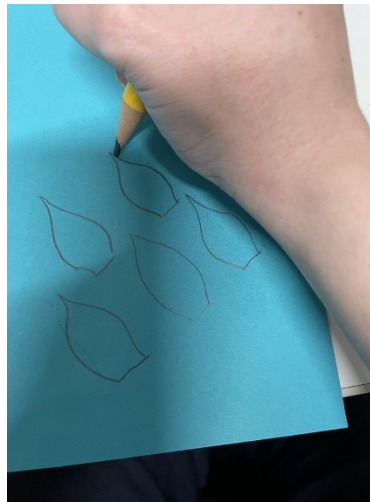

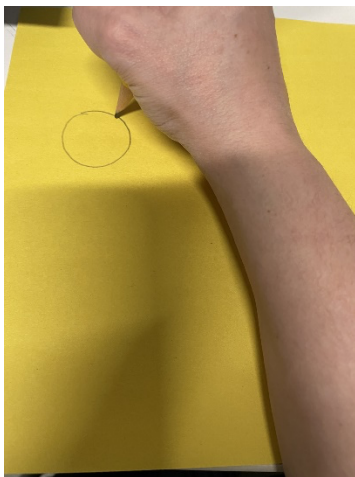

Green is for my ground color and the blue is what I chose for the background.

I cut little strips in the green paper to make it look like grass.

2. On a separate piece of colored paper draw flower pedals and a circle center. Then cut them out.

COLUMBUS METROPOLITAN LIBRARY

READY FOR KINDERGARTEN

3. **Glue the flower petal pieces together to make a flower. Make as many flowers as you want to create your flower garden. Hang it up or put it in a special place!**
